DETAILED ACTION

1. Claims 1-64, 67 and 68 have been presented for examination.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-7, 9, 10, 12, 13, 67 and 68, drawn to a method of aggregating a plurality of blocks, classified in 703/6.

Group 2, claim(s) 8 and 11, drawn to a method of determining slope constraints, classified in 703/2.

Group 3, claims(s) 14-26, drawn to a method of determining a cluster of material, classified in 702/6.

Group 4, claims(s) 27-39, drawn to a method of determining characteristics of a selected portion of material, classified in 299/58.

Group 5, claim(s) 40-49, drawn to a method of analyzing a selected volume of material, classified in 702/11.

Group 6, claim(s) 50-64, drawn to a method of determining a selected group of blocks of a mine pit which are capable of being mined, classified in 702/9.

3. The inventions listed as Groups 1-6 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups of claims are directed to separate and distinct inventions that do not include a common or corresponding technical feature, and further, would require separate searches and classification in the art as recited above.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
